

SAHAYAK- Web App

Introduction

Security and crime related issues have become rampant in most urban areas across the world. In today's era where there is everything available online. So when it comes to public and police assistance we lack technology. We don't have any website or application which can connect people to police or law enforcement officers.

So we had proposed a project named **SAHAYAK**. Sahayak is a web app which is a responsive web application for Police and Public assistance. This web app provides online assistance for the public to report any crime in minutes. This app will be in English language in which we will add other languages like Hindi in future as well.

Main Features that our web app will possess are as follows:

- Local/User verification
- Available in Multiple Languages
- Online complaint portal
- 24x7 chat bot support
- Area wise Crime analysis
- Dark Mode/light mode
- Custom Scroll bar
- Scroll to Top button
- And many more

Tech stack (MERN+ML)

➤ **Web development**

- Node js (v14.17.4)
- React js

➤ **Machine Learning**

- Jupyter notebook/ google colab

(and more based on requirements)
